

Multiple Cloud Integrated Solutions

A&T has several authorized CSP resellers and service providers that can meet any cloud-related need for CSPs or services that you may have. These partners offer deep expertise on each CSP. All CSPs offer geographically dispersed sites for DR and all are FedRAMP-certified at “Moderate” with two at “High”. **A&T Provides a Complete Cloud Integration Solution: Deployment Models, Service Types, and a Wide Range of SaaS Applications**

Cloud	Ideal For
AWS Cloud	Virtually any cloud workload, in general, but especially those workloads that can use innovative IaaS features and services or a broad solution set in AWS Market Place
AWS GovCloud	Same workloads as for AWS commercial cloud but requiring more stringent security including ITAR compliance and for government only CSP Top-Level Profile
Azure	MS Windows-centric apps and Office 365; cheapest storage; more compliance standards (50+); better privacy protection; multi-tenant
Azure Govt	Same as commercial except that Azure government is for government only
Google	Google-unique features: Google Maps; Gmail, Big Data Analytics, Machine Learning, Identity & Security, Management & Developer Tools
Iron Mountain	Infrastructure that can be tailored to meet customer-specific needs for private cloud and 15-minute audit access. Dedicated and highly secure infrastructure to alleviate worries over proprietary data (i.e., Title 26)
Oracle	Oracle unique solutions: e.g., Oracle 12c Cloud Monitoring, Real Application Clusters, WebLogic 12c, Oracle Internet Directory with Single Sign-On, and ERP/PeopleSoft
QTS	Large private or community cloud environments with national footprint for projects with large “iron”
Softlayer	Bare metal, VMware, hybrid, & IaaS solutions using two dispersed, dedicated Govt Data Centers.
Virtustream	Immediate efficiencies for mission-critical enterprise workloads without having to architect them for the cloud because unique pricing model lets customer lift and shift workloads

Multi-cloud Management from a Single Pane of Glass

We offer the ServiceNow platform. From this platform, we solve the most vexing issues of orchestrating multiple cloud from a single pane of glass. You can also see a consolidated service catalog. Receive consolidated bills from multi-cloud and allocate costs to organizational units. You can also monitor performance and usage and manage SLAs from a unified interface. ServiceNow also meets Federal security policies and is ready to receive agency ATO.

Federal, State, and Education Clients Enlist A&T Systems to Assist with Cloud Migration, Architecture, Design, Deployment, Security, and Managed Services

A&T Systems is a small business offering highly experienced cloud architects/engineers who provide 155,000 AWS Contract Line Item Numbers (CLINs), Professional Consulting Services Labor Categories, and Cloud Managed Services via Government Wide Acquisition Contracts (GWACs), and cloud consulting to many government clients.

With 34 years of government experience, we deliver 24/7 Cloud NOCC support using certified, cleared AWS architects/engineers; U.S. citizens.

Award-Winning Support for District of Columbia Health Benefit Exchange Cloud Services Contract—Voted Best ACA Site in the U.S.!

Amazon Web Services awarded a 2016 City on a Cloud “Best Practices” citation to the District of Columbia Health Benefit Exchange Authority for innovations on its Cloud Services project. As a prime contractor on this project, A&T provided AWS IaaS, PaaS, and the security ATO that contributed to project’s success.
